- » Bluetooth functionality

↑ Speaker for Bluetooth and navigational voice prompts

M-Nav 760 with adjustable docking bracket

TRACKING, MESSAGING & NAVIGATION

saves you time and money

- 📞 Fixed price messaging between the office and M-Nav 760 will reduce phone bills
- 📞 Messaging allows for accurate communication, reducing misunderstandings or missed information
- 📞 Routing keeps your staff moving, hence no more wasted time getting lost, reading maps or going the long way
- 📞 The M-Nav 760 will sound an alert when a new message is received. So no more interruptions on the job answering calls, checking voicemail or missing messages
- 📞 Driver identification functionality matches drivers to vehicles for accurate reporting
- 📞 Overspeed alerts will warn drivers when speed limits have been exceeded

JUST ACCEPT AND GO

RECEIVE MESSAGE & CONFIRM JOB – **ACCEPT** > M-NAV 760

AUTOMATICALLY NAVIGATES TO CUSTOMER LOCATION – **GO** >

HOW IT WORKS

Your customer calls with a job

The office staff finds the customer's address on OnlineAVL2 using 'search address' and clicks 'Route to'

A message embedded with the customer's address and job information is sent to the M-Nav 760 device

The field staff receives the message and accepts the job. The M-Nav 760 then automatically navigates to the customer's location

M-Nav 760
